SPRUNG INSTANT STRUCTURES

Stressed Membrane Structure Technology

A Relocatable Building Alternative ideal for Remote Mining Operations Worldwide

Bulk Storage and Warehousing

The Sprung Advantage

FASTER PROJECT COMPLETION

- Over 2 million square feet of inventory available for immediate delivery.
- Erected in a fraction of time of conventional construction.

NO FOUNDATIONS REQUIRED

- Structures can be erected on any reasonably flat ground surface without the need for footings or foundations.
- Construction costs and time-lines significantly reduced.

FULLY RELOCATABLE AND MODULAR

- Ability to disassemble, move, reconfigure or expand.
- A salvageable asset at mine expiry.

LEASE OR PURCHASE

- Leasing provides a cost effective solution for temporary and semi permanent applications.

SIGNIFICANTLY LOWER COST

- Dramatically less expensive to ship to remote locations.
- Significant costs savings over conventional construction solutions.

RELIABILITY

- A proven track record at mine sites around the world.
- Certified Engineered drawings and supporting calculations available.

GUARANTEE

- Structures include a conditional pro-rata guarantee of 30 years on the aluminum substructure and up to 20 years on the architectural membrane.
