

SPRUNG INSTANT STRUCTURES

Stressed Membrane Structure Technology

An Innovative Relocatable Building Alternative Meeting the Challenges of Airport Expansion and Security

110,000 sq. ft. Air Cargo Sort Facility, Schiphol International Airport, Amsterdam

The Sprung Advantage

"Stay flexible in an environment of continuous change"

FASTER PROJECT COMPLETION

- Over 2 million sq. ft. of inventory available for immediate delivery.
- Erected in a fraction of time of conventional construction.

FULLY RELOCATABLE AND MODULAR

- Ability to disassemble, move, reconfigure or expand.

NO FOUNDATIONS REQUIRED

- Existing tarmac is suitable for erection of most structure sizes.
- Construction costs and time lines significantly reduced.

SIGNIFICANTLY LOWER COST

- Sprung Structures provide significant cost savings over conventional construction solutions.

LEASE OR PURCHASE

- Leasing provides a cost effective solution for temporary and semi-permanent applications.

GUARANTEE

- Structures include a conditional pro-rata guarantee of 30 years on the aluminum substructure and up to 20 years on the architectural membrane.
